

DAILY ASSESSMENT FORMAT

Date:	23-5-2020	Name:	Ankitha c c
Course:	Python programming	USN:	4a116ec004
Topic:	Python coding challenge	Semester & Section:	8 th & A
Github Repository:	Russell1005		

Image of session

Write python code to verify user_name = "Micheal" and password ="e3\$WT89x". The total number of attempts are 03. For every wrong user_name and password Print - Invalid username or Password

```
name="micheal"
password="e3$wt89x"
c=0
while(c!=3):
    c+=1
    testname=str(input("enter username:"))
    testpass=str(input("enter password:"))
    if((testname==name)and(password==testpass)):
```

```
    print("you have successfully login")
    break
else:
    print("invalid username and password")
if(c==3):
    print("account locked")
```
